THE WIDER THE CHOICE, THE GREATER THE TROUBLE? THE LATEST INFORMATION BOOKLETS ABOUT THE CZECH REPUBLIC

Sarah Scholl and Tobias Weger

In this article, ten information booklets are reviewed. The booklets, offering Czech area studies in a nutshell, have been published by governmental institutions specialising in political education (the Federal Centre of Political education and its subdivisions in diverse German federal states), the – non-governmental – Society for Tourism and Development Research, youth organisations or institutions work-

ing with young people under the umbrella of the Christian churches, or in the series Wochenschau. First and foremost, the reviewers checked the booklets for their suitability for classroom work or for use by young people in general.

Most booklets present a historic account. Whereas the products of the Federal Centre, in particular, retain a national conception of history, others, some having well-known authors, reflect recent research and show an attempt at a more differentiated presentation. Only a few deal, apart from brief overviews of economic and political structures, with contemporary everyday life or with inter-cultural problems with respect to German-Czech relations. A comprehensive booklet which would meet all requirements is thus still something very much needed.
